EXPERIENCE

React Developer

[Expensify](#)

Created React/Redux application including a complete Jest/Enzyme testing suite. Completed Webpack config and included babel-polyfill for older browsers. Google authentication and database through firebase. UI experience through SASS and media responsiveness.

Project Manager/ Database Engineer

[SIM](#)

Trello project management to ensure effective time management of individual progression and allocating resources appropriately to meet deadlines. Created back end using Node.js and Express.js with MongoDB as database. Created Authentication using Passport.js and testing using Mocha and Chai.

Animation Designer

[Cat Fight](#)

Created animation using technologies including Mixamo, Blender and Texture Packer to create sprite animation. JavaScript and jQuery for UI and MySQL for database.

UI JavaScript Developer

[Hangman](#)

Utilized jQuery and JavaScript animation for optimal UI experience. Media Responsive using bootstrap.

UI React Developer

[Memory](#)

UI project using React.js to create a great user experience. JSON was Used to create a database-like structure for images to be repurposed.

IT Engineer / Assistant Store Manager - 11/2012 - 06/2018

DSW

Maintained and reengineered master CPU for efficiency with subpar internet connectivity. Troubleshooting hardware and software on site as well as managed multiple projects simultaneously for customer satisfaction and to maximize profit. Maintained full staff and trained appropriately according to goals of individual and company.
